

Single Thread Performance

This chart comparing the single thread performance of CPUs is based on the average [PerformanceTest](#) benchmark results from millions of machines and is updated daily. It focuses exclusively on single-threaded performance, meaning each CPU is assessed based on its ability to perform a single task at a time. The results are categorized according to the typical use of the CPUs, such as Laptop, Server, etc. Only the top 250 results for each category are displayed here. For a comprehensive view of single-threaded performance across all CPUs, please refer to the [CPU Megapage](#).
